

CRIMSON (#8B263E). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **C**olored initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpDeepCrimson to test color edge sharpness and haloin.

BRICK (#A63A3A). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **B**olored initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpMutedBrick to test color edge sharpness and haloin.

DARKRED (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **D**olored initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in DarkRed to test color edge sharpness and haloin.

INDIAN (x11). Extended standard black text line

designed to evaluate paper opacity and ink density contrast. Black line continues here with an **I**nitial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in IndianRed4 to test color edge sharpness and haloin.

RED (#E60000). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **R**ed initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpFieryPureRed to test color edge sharpness and haloin.

ORANGE (#FF3300). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with an **O**range initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpHighPopOrange to test color edge sharpness and haloin.

SVGORG (svg). Extended standard black text line designed to evaluate paper opacity and ink density con-

trast. Black line continues here with an **Orange** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in OrangeRed to test color edge sharpness and haloing.**

TOMATO (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Tomato** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in Tomato to test color edge sharpness and haloing.**

RED2 (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Red** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in Red2 to test color edge sharpness and haloing.**

DVIPS (RGB). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Dvips** initial inline test. Underlined sen-

tence testing soul package underline contrast. **Double length inline sentence in kdpVibrantOrangeRed to test color edge sharpness and haloing.**

KDPORG (#D92B00). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **KdpOrg** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in kdpDensityOrangeRed to test color edge sharpness and haloing.**

WARMC (RGB). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Warm** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in kdpWarmCrimson to test color edge sharpness and haloing.**

VIBMAG (#E0115F). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Vibrant** initial inline test. Underlined sen-

tence testing soul package underline contrast. Double length inline sentence in kdpVibrantMagentaCrimson to test color edge sharpness and haloling.

HOTRSP (#DE3163). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Hot** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpHotRaspberryCrimson to test color edge sharpness and haloling.

SATCER (#DE004E). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Saturated** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpSaturatedCerise to test color edge sharpness and haloling.

ELECRS (#F00056). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with an **Electric** initial inline test. Underlined

sentence testing soul package underline contrast. Double length inline sentence in kdpElectricRoseCrimson to test color edge sharpness and haloling.

FIRFCH (#E30B5C). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Fiery** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpFieryFuchsiaCrimson to test color edge sharpness and haloling.

VIVCAR (#D10047). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Vivid** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpVividWarmCarmine to test color edge sharpness and haloling.

NEOPNK (#FF0055). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Neon** ini-

tial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpNeonCrimsonPink to test color edge sharpness and haloing.

DEPSHK (#C70039). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Deep** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpDeepShockingCrimson to test color edge sharpness and haloing.

PURER (#D00000). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Pure** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpPureCadmiumRed to test color edge sharpness and haloing.

SCARL (#FF2400). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line con-

tinues here with a **Scarlet** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpBrightScarlet to test color edge sharpness and haloing.

CARMN (#960018). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Carmin** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpRichCarmin to test color edge sharpness and haloing.

RUBY (#9B111E). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Ruby** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpCoolRuby to test color edge sharpness and haloing.

FIRE (#E50914). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Fire** initial inline test. Underlined sentence

testing soul package underline contrast. Double length inline sentence in kdpSinglePassFire to test color edge sharpness and haloing.

PRIMR (#EE1C25). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **P** Primary initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpCalibratedPrimaryRed to test color edge sharpness and haloing.

FIREB (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **F** FireBrick initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in FireBrick to test color edge sharpness and haloing.

CRMSN (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **C** Crimson initial inline test. Underlined sentence testing soul pack-

age underline contrast. Double length inline sentence in Crimson to test color edge sharpness and haloing.

RED3 (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **R** Red initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in Red3 to test color edge sharpness and haloing.

NAVY (#1F3A52). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **N** Navy initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpDeepSlateNavy to test color edge sharpness and haloing.

STEEL (#3B6E8C). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **S** Steel initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpMutedSteelBlue to test color

edge sharpness and haloing.

SVGSTL (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Steel** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in SteelBlue to test color edge sharpness and haloing.

DEEP (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Deep** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in DeepSkyBlue4 to test color edge sharpness and haloing.

MIDNT (RGB). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Midnight** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpDarkSlateBlue to test color edge sharpness and haloing.

BLUE (#0055FF). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Blue** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpElectricBlue to test color edge sharpness and haloing.

COBALT (#0066EE). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Cobalt** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpHighLuminanceCobalt to test color edge sharpness and haloing.

TRUEB (#0047AB). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **True** initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpPureCobaltBlue to test color edge sharpness and haloing.

RYLB (#0038A8). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **R**oyal initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpCyanProtectedRoyal to test color edge sharpness and haloint.

ULTB (#0052D4). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with an **U**ltra initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpVibrantElectricBlue to test color edge sharpness and haloint.

SPPH (#0F52BA). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **S**apphire initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpRichSapphire to test color edge sharpness and haloint.

CLSSB (#0F4C81). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **C**lassic initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpDarkClassicBlue to test color edge sharpness and haloint.

PRMB (#0066CC). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **P**rimary initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in kdpBalancedMediumBlue to test color edge sharpness and haloint.

RYLS(svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **R**oyal initial inline test. Underlined sentence testing soul package underline contrast. Double length inline sentence in RoyalBlue to test color edge sharpness and haloint.

M^E_{DB} (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Medium** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in MediumBlue** to test color edge sharpness and haloing.

D^G_B (svg). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Dodger** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in DodgerBlue** to test color edge sharpness and haloing.

R^B_{L3} (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Royal** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in RoyalBlue3** to test color edge sharpness

and haloing.

D^B_{L3} (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Dodger** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in DodgerBlue3** to test color edge sharpness and haloing.

B^L_{U2} (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Blue** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in Blue2** to test color edge sharpness and haloing.

B^L_{U3} (x11). Extended standard black text line designed to evaluate paper opacity and ink density contrast. Black line continues here with a **Blue** initial inline test. Underlined sentence testing soul package underline contrast. **Double length inline sentence in Blue3** to test color edge sharpness and haloing.
